

Journal of Higher Learning for Today's Servicemember

Military Advanced Education

March 2009
Issue 4 | Volume 2

Cover & In-Depth Interview with

MG Melvin G. Spiese

Commandant U.S. Marine Corps
Training and Education Command

SPECIAL FOCUS: New Technologies in Distance Learning

With the advent of portable Internet devices, the newest handheld technologies are enabling servicemembers to access interactive synchronous and asynchronous applications when and where they need them.

FEATURES:

Distance Education Training Council (DETC)

A leader in the accreditation of nationally based distance learning institutions, DETC offers a wide variety of training and degree programs that enable servicemembers to complete their educational commitments without interruption.

What's New in Online Degrees?

More colleges and universities are offering degree programs in an online format. This has enabled greater numbers of active duty and transitioning servicemembers to pursue educational opportunities in their military and postmilitary careers.

DANTES Profile Distance Learning Through DANTES

An increasing number of servicemembers are choosing online education through DANTES to achieve their degree and certification goals.

TRANSITIONS AND SECOND CAREERS: Careers in Engineering

Of increasing importance in our high-tech world, the field of engineering offers servicemembers with the proper requisite skills a viable career option upon transitioning out of military service.

Insertion Order Deadline: **February 26, 2009** Ad Materials Deadline: **March 5, 2009**
