DEFENSE INFORMATION SYSTEMS AGENCY

P. O. BOX 4502
ARLINGTON, VIRGINIA 22204-4502

April 2009

To Our Valued PLD/DITCO Customers:

As the new Director of DISA's Procurement Directorate, it is my distinct honor to present the 2009 DISA Contracts Guide. This Guide has been updated to provide you our most current list of contracts available from the Defense Information Technology Contracting Organization (DITCO).

DITCO's professional workforce procures global net-centric capabilities and supports customers through timely, quality and ethical contracting. We strive to meet this mission by offering many diverse contracts for telecommunications and information technology services, systems, equipment and support. As you look through the 2009 Guide, you will notice many contracts are performance-based, flexible and easy to use. Our DITCO contract specialists can assist by issuing task/delivery orders for you, or in some cases, your own contracting officers can take advantage of our "decentralized ordering." Decentralized ordering allows you the flexibility of ordering and administering your task/delivery orders. Either way, you receive the services you require quickly and efficiently and receive the best value solution.

DITCO awarded new contracts which now appear in the 2009 Contracts Guide such as ENCORE II. As other new contracts are awarded, we will post them on the 2009 DISA Contracts Guide on our web site, www.disa.mil. We also recommend that you visit our web site at <http://ditco.disa.mil/hq/contracts/index.asp> for additional information on all of our contracts.

This year the DISA Customer Conference theme is "One Force. One Focus. Connected." Our DITCO contracts have been striving to achieve this goal for several years. Our contracts enable interoperability and joint use systems for our joint warfighting forces. We stay "connected" to our customers by collocating with them at strategic locations. We have offices to support you in the National Capital Region; Scott Air Force Base, IL; Sembach, Germany; Ford Island, HI; Elmendorf Air Force Base, AK; Japan; and Bahrain.

We are funded completely through Defense Working Capital Funds. As a member of the Defense Working Capital Fund, we charge our customers a fee-for-service. Our goal is to recover our operating costs, not to make a profit. In FY2006, DITCO lowered its long-standing fee-for-service from 2% to 1.25%. This allowed us to return accumulated surplus to our customers from previous fiscal years. We have now drawn down to our break even point, so in FY2010, we will return to our original 2% fee. This 2% fee should provide sufficient revenues to break even over the long term.

The Procurement Directorate has outstanding personnel who are committed to providing excellent support to customers and the warfighter. We look forward to helping you meet your mission needs.

A handwritten signature in blue ink that reads "Kathleen Miller".

KATHLEEN MILLER
Director for Procurement
Chief, Defense Information Technology

Data Link Service Provider Contract (DSP)

HC1013-06-D-2001

The DSP provides new data link and voice capabilities for Global Air Traffic Management aircraft.

What can the contract be used for?

- Provides data and voice communications between airborne and ground subsystems
- VHF and HF radio services for aircraft not equipped with data link
- Engineering Support including configuration support and test support
- Air/Ground Data Link
- Air/Ground Voice
- Ground/Ground Data Link
- Value-Added Data Link Services - Digital ATIS, Up-linked Oceanic Clearance Delivery, Down-linked Oceanic Clearance Delivery, Direct Satellite Dialing, and Graphical Flight Services such as Aircraft Situation Display, Weather Data and Airport Data
- Air/Ground Radio
- Detailed monthly reports describing technical and managerial activities

Who can use this contract?

The Department of Defense (DOD) aircraft fleets either equipped or non-equipped with Global Air Traffic Management (GATM).

What is the best process to use this contract?

Contact the Contracting Officer at (618) 229-9402.

DISN Access Transport Services (DATS)

HC1013-07-D-2005 (Region 1)

HC1013-07-D-2006 (Regions 3 & 4)

HC1013-07-D-2007 (Region 2)

The DISN Access Transport Services contracts provide telecommunication transport services in the Continental United States (CONUS) from telephone company demarcation point (telco demarc) to telco demarc. CONUS is divided into four Regions (Region 1 - Western US; Region 2 - Midwest US; Regions 3 & 4 - Eastern US). DATS may also provide service normally defined as inside wire between a telco demarc and a customer-defined Service Delivery Point (SDP) at another location on the base/camp/post/station.

What can these contracts be used for?

To provide specific bandwidth for transport services to any CONUS user listed in DISA Circular 310-130-1, Table T1.1.

Who can use these contracts?

Any CONUS user listed in DISA Circular 310-130-1, Table T1.1.

What is the best source to get information and materials?

Use of DATS is based upon a provisioning solution. Please contact DISA CONUS Customer Support Division, DISACONUSCustomerService@disa.mil, telephone 618-220-9922 or the DISN Customer Call Center (DCCC) at 1-800-554-3476.

What is the best process to use these contracts?

Interested customers should submit their Telecommunications Service Requests through DDOE in accordance with DISA Circular 310-130-1.

Prime Contractors:

Region 1 – QWEST Government Services, Incorporated (HC1013-07-D-2005)

Region 2 – AT&T Corporation (HC1013-07-D-2007)

Regions 3 & 4 – Arrowhead Global Solutions, Incorporated (HC1013-07-D-2006)

KEEPING DISA STRONG, SOLDIERS CONNECTED, AND AMERICA SECURE

For over 18 years, DISA has trusted Apptis to provide network engineering support. With enemies targeting everything from foxholes to networks, designing and protecting the DISN is critical to our national security. Apptis is committed to delivering world class practices, unparalleled service, and innovative net-centric engineering to keep DISA strong, soldiers connected, and America secure. See us at the DISA Customer Partnership Conference in Booth #509.

APPTIS IS DEFENSE. APPTIS IS SERVICES.

Defense Information System Network (DISN) Global Solutions (DGS)

DCA200-02-D-5000 and 5001

The DGS contracts provide life cycle support management for the DISN worldwide.

What can the contracts be used for?

- Program Management
- Cost/Schedule Management
- Financial Management
- Systems Engineering
- Hardware and Software Management
- Test and Evaluation
- Manufacturing, Engineering and/or Logistics Support
- Network Information Services
- Network Management and Control -CONUS and OCONUS
- Installation and Maintenance for Asynchronous Transfer Mode (ATM) Protocol and Internet Protocol Routers -Worldwide
- Augmentation of CONUS Regional Network Operations and Security Center
- Asynchronous Transfer Mode (ATM) Services -Worldwide
- Management Information System (MIS) Support
- DISN Service Center (DSC) Circuit Implementation Team
- Transition Support Services
- Transmission Operations Management Support
- Defense Message System (DMS) Transition Hub (DTH) Hardware Maintenance
- Integrated Digital Network Exchange (IDNX) Maintenance and Operations Management
- DISN Training
- Configuration Management Program Management and Access
- DISN Program Management Support
- Digital Voice System (DVS) Program Support and Operations Center Support

Who can use these contracts?

The Department of Defense, its authorized customers and other federal agencies.

What is the best process to use this contract?

Contact the Contracting Officer at (618) 229-9475 or the Contracting Officer's Representative (COR) at (703) 882-0763.

Prime Contractors:

Apptis (small business)

Science Applications International Corporation (SAIC) (large business)

Subcontractors:

There are several major subcontractors (large, small and small disadvantaged businesses); subcontractors can be added at the request of the prime contractors and are not limited to only one prime contractor.

Defense Information System Network (DISN) Network Management Support Services Global (DNMSS-G)

HC1013-07-D-2023

The DNMSS-G/R Associate Support Contract (ASC) provides support services for DISN-related networks and systems, and for other Department of Defense (DoD) and Government networks and systems. This includes providing continuing system planning and support, operational analyses, system management, operations, maintenance, and technical enhancement services at Task Order-specified locations for components of the DISN.

HC1028-08-D-2000

The DNMSS-G/R Network Engineering Contract (NEC) provides support services associated with network and system management and other related support services for DISA and DoD Military Services and Agencies, and other U.S. Government Departments and Agencies on a global basis. This includes providing continuing system and network planning, engineering, enhancement, acquisition, implementation, integration, management, maintenance and operations support at Task Order-specified locations for components of the DISN.

What can these contracts be used for?

- Defense Switched Network (DSN) (voice services)
- Defense Red Switch Network (DRSN) (secure voice services)
- DSN and DRSN network management systems
- Advanced DSN/DRSN Integrated Management Support System (ADIMSS/ARDIMSS)
- Integrated Network Management System (INMS)
- Joint DISN Control System (JDCCS)
- Trouble Management System (TMS)
- Report Management System (RMS)
- Integrated Configuration and Tracking System (ICATS)
- Other specified DISN networks and systems and their respective management systems

Who can use these contracts?

The Department of Defense and its authorized customers.

What is the best source to get information and materials?

Contact the Contracting Officer at (618) 229-9498 or Contracting Officer's Representative (COR) at (703) 882-0783. Additional information can be found at <http://www.ditco.disa.mil/contracts/catalog.asp>.

Defense Information System Network (DISN) Satellite Transmission Service-Global (DSTS-G)

DCA200- 01-D-5002 thru 5004

The Defense Information System Network (DISN) Satellite Transmission Service-Global (DSTS-G) contracts provide a full range of global fixed satellite bandwidth, earth terminals and related satellite-based business and enterprise services and solutions.

What can the contracts provide?

- Global Fixed Satellite Bandwidth
- Bandwidth and Service Management
- Leased Earth Terminal Services
- Purchase Earth Terminals
- Global On-Site Earth Terminal Operation and Maintenance
- Commercial Teleport Services
- U. S. and Foreign Bandwidth and Terminal Licenses and Approval
- Terrestrial Interconnection Services to Support Satellite Service
- Host Nation Agreement-Negotiation Support
- Systems Engineering Support
- First Right of Refusals and Guaranteed Reservations
- DISN Common-User Hub Services
- Multiple Location Turnkey Satellite Systems

Who can use the contracts?

The Department of Defense, its authorized customers and other federal agencies.

What is the best source to get information and materials?

Contact the Contracting Officer at (618) 229-9220 or the Program Manager (703) 882-0644. Additional information can be found at: <http://www.ditco.disa.mil/hq/contracts/dstsgchar.asp>

What is the best process to use these contracts?

Submit Telecommunications Service Requests (DISA Circular 310-130-1) and/or a Performance Work Statement. Additional contact information is available at the web site above.

Defense Information Systems Network (DISN) Transmission Services-Pacific II (DTS-P II)

HC1019-09-D-2000

This contract is a communications “building block” of the Global Information Grid. DTS-P II provides “one stop shopping” with the contractor handling all foreign carrier and local exchange carrier coordination to connect any site in the Pacific (including Alaska) to any location in the world. DTS-P II also covers South America and regions under the responsibility of United States Southern Command.

DTS-P II will provide the Defense Information Systems Agency (DISA) transmission service requirements for the Expanded Pacific Region. The Expanded Pacific Region consists of the Pacific Command (PACOM), Northern Command (NORTHCOM), Southern Command (SOUTHCOM), and Central Command (CENTCOM) Areas of Operation (AOR). The essential characteristics of these requirements are end-to-end information transfer services to the Department of Defense (DoD) and authorized non-DoD operations, seamless interoperability with the global Defense Information System Network (DISN), positive control, robust bandwidth, provisioning agility and flexibility, diversity, security, cost-effectiveness, technology insertion and enhancements.

What can this contract be used for?

- Dedicated Transmission
- Undersea Cable Leases
- Satellite Communications
- Asynchronous Transfer Mode (ATM) Services
- Internet Protocol (IP) Router services, including Network Access Points (NAP), Internet Exchange Points (IXP) and other internet access points and Internet Service Provider (ISP) connections
- Encryption and Timing
- Equipment Installation and Maintenance
- Network Management and Monitoring
- Provisioning and Trouble Ticketing
- Fiber Optic Cable Installation and Maintenance

Who can use this contract?

The Department of Defense, authorized non-DoD operations, other Federal agencies and U.S. allies.

What is the best source to get information and materials?

Contact the Defense Information Technology Contracting Organization-Pacific (DITCO-PAC) at (808) 472-0280, or go to <http://www.ditco.disa.mil/pac>

What is the best process to use this contract?

Submit a request for service to DISA or contact DITCO-PAC using the above information. Customers will provide their requirements via DDOE.

Prime Contractor:

Verizon Business Network Services Inc.

ENCORE II

HC1028-08-D-2001 through 2003 and HC1028-08-D-2005 through 2027

The ENCORE II contracts provide IT solutions for activities throughout all operating levels of all customer organizations in support of all functional requirements including Command and Control (C2), Intelligence, and Mission support areas, and to all elements of the Global Information Grid (GIG).

What can this contract be used for?

- Task Area 1 - Enterprise IT Policy and Planning
- Task Area 2 - Integrated Solutions Management
- Task Area 3 - Performance Benchmarking
- Task Area 4 - Business Process Reengineering (BPR)
- Task Area 5 - Requirements Analysis
- Task Area 6 - Market Research and Prototyping
- Task Area 7 - Information and Knowledge Engineering
- Task Area 8 - Custom Application Development
- Task Area 9 - Product Integration
- Task Area 10 - Test and Evaluation (T&E)
- Task Area 11 - Asset Management
- Task Area 12 - Communications Engineering
- Task Area 13 - Security Engineering Certification and Accreditation
- Task Area 14 - Telecommunications Support
- Task Area 15 - Computer-Telephony Integration (CTI)
- Task Area 16 - Web Services
- Task Area 17 - Operations Support
- Task Area 18 - Hardware
- Task Area 19 - Software
- Task Area 20 - Managed Services

Who can use this contract?

Military Services, the Department of Defense (DoD) and other agencies of the Federal Government

What is the best source to get information and materials?

Go to www.ditco.disa.mil/hq/contracts/encorllchar.asp

What is the best process to use this contract?

Task order guidelines at the above Web site reflect easy, step-by-step instructions and sample documents showing how to assemble a requirements package.

The ENCORE II Task Order Guidelines is a comprehensive handbook of how to use the ENCORE II Contracts.

The guidelines consist of a five chapter basic document with twenty-four separate attachments to explain ENCORE II and provide templates for assembling your requirements package.

External Contracting Agencies may place orders directly against this contract. A copy of the contract is available on the above Web site.

Europe Enterprise Wireless Services Contract

HC1021-05-D-2000

The Wireless Services Contract provides commercial Global System for Mobile (GSM) telephone services, wireless Personal Digital Assistant (PDA) services, and other wireless services for all DITCO Europe customers throughout the U.S. European Command (USEUCOM) and the U.S. Central Command (USCENTCOM) Areas of Responsibility (AORs).

What can the contract be used for?

- Wireless equipment
- Wireless services and equipment
- Local Wireless Service
- Wireless PDAs/Service
- Long-Term Subscriptions
- Short-Term Rentals
- 24/7 Customer Service

Who can use this contract?

All DITCO-Europe customers stationed in Afghanistan, Bahrain, Belgium, Bosnia Herzegovina, Bulgaria, Croatia, Egypt, Germany, Greece, Iraq, Israel, Italy, Luxembourg, Kuwait, Netherlands, Nigeria, Oman, Pakistan, Poland, Qatar, Romania, Spain, Turkey, United Arab Emirates, United Kingdom and Yemen.

What is the best process to use this contract?

The DITCO-Europe Enterprise Wireless Contract offers several options for the placement of orders as follows:

- **ARMY Commands under USEUCOM** - shall order via HQ, 5th Signal Command G4, Contract Management Division CMR 421 APO, AE 09056, DSN: 314-380-5324.
- **Decentralized Ordering** - Ordering may be authorized for all US Government Contracting Offices and Authorized Ordering Officers appointed by DITCO-Europe. Decentralized orders are subject to the DITCO-Europe Enterprise Wireless Contract administrative fee of 1%. This fee will be applied to all costs associated with the total monthly value of the wireless services and products purchased under this contract. Prior to ordering all interested Contracting Offices and Ordering Officers shall request approval from the DITCO-Europe Contracting Officer. Ordering Instructions shall be provided by DITCO-Europe at the time of appointment.
- **Centralized Ordering** - DITCO-Europe Contracting Office is available for the placement of orders in support of customer's wireless needs throughout the USEUCOM and USCENTCOM AOR's. All orders placed directly through DITCO are subject to the nominal DITCO fee for service of 1.25% (2% effective 01 October 2009). All Wireless requests are to be submitted to DITCO via the DISA Direct Order Entry (DDOE) ordering tool: (<https://www.disadirect.disa.mil/products/asp/welcome.asp>).
For additional information or ordering officer requests feel free to contact the DITCO-Europe Contracting Officer at DSN 314-496-7658, Commercial: +(49) 6302 922732.

Interested customers should submit their Telecommunications Service Requests in accordance with DISA Circular 310-130-1.

Prime Contractors:

AOS, Inc.

L-3 Global Communications Solutions, Inc.

Arrowhead Global Solutions, Inc

ADC of Delaware, LLC

O'Gara Satellite Systems, Inc.

Iridium Enhanced Mobile Satellite Service (EMSS)

HC1047-08-D-0002

The EMSS contract provides a full range of Iridium satellite and ancillary equipment to be used with Iridium satellite airtime service, for instance, the purchase of Iridium telephones, pagers, secure modules, ancillary equipment and active or inactive Subscriber Identification Modules (SIM) cards. Telephones can be used worldwide except for four countries: Hungary, Poland, North Korea and North Sri Lanka. With proper encryption loaded, one Iridium telephone to another Iridium telephone has Top Secret capability. An Iridium telephone also allows a Secret connection to a desktop telephone, and plans are underway to eventually provide a Top Secret capability. Lead times are seven to 14 days.

What can this contract be used for?

To purchase the following equipment:

- Iridium 9505-securable satellite telephones
- Iridium-secure modules
- SIM cards
- Ancillary equipment (batteries, etc.)

Who can use these contracts?

The Department of Defense, authorized non-Department of Defense customers and customers in Australia, the United Kingdom, Canada and New Zealand.

What is the best source to get information and materials?

Go to <http://www.ditco.disa.mil/contracts/catalog.asp>.

Prime Contractor:

General Dynamics Decision Systems, Inc.

Joint Hawaii Information Transfer System (JHITS)

HC1019-06-D-2002

The Joint Hawaii Information Transfer System (JHITS) provides the primary inter-and intra-base telecommunications services for the Department of Defense (DOD) in the State of Hawaii, providing end-to-end common user switched and dedicated transmission services.

What does this contract include?

Task Service CLINs:

- Manage day-to-day Network Telecommunication Services (NTS) operations
- Switch Telecommunication Services (STS) Maintenance
- Base Telecommunication Services (BTS)
- Navy Pier Side Telecommunication Services (PTS)

CLIN-based services: (MILDEP or DISA-unique telecommunications service CLINs ordered "as required")

- Maintenance of critical assured services
- Installation/Maintenance of Point-to-Point dedicated circuits
- Installation/Maintenance of outside plant cable
- Installation/Maintenance of customer premise equipment
- Switched Voice Services (SVS) & ISDN for Outer Islands
- Maintenance of Network Management System equipment

Vendor-unique provisioning workstations and software

What can this contract be used for?

- Dedicated Transmission
- Switched Voice (Analog and Digital)
- Pier Side Communications (Ship lines)
- Switched Data
- Asynchronous Transfer Mode (ATM) Services
- Integrated Services Digital Network (ISDN) Services
- 24x7 Military Operator Services
- Emergency 911
- Customer Premise Equipment Installation and Maintenance
- Network Management and Monitoring
- Automated Provisioning and Trouble Ticketing
- Fiber Optic Cable Installation and Maintenance Training

Who can use this contract?

The Department of Defense (DoD), and other federal agencies in the State of Hawaii.

What is the best source to get information and materials?

Contact AT&T JHITS at (808) 659-1400, the Defense IT Contracting Organization-Pacific (DITCO-PAC) at (808) 472-2507, or go to <http://www.ditco.disa.mil/pac>

What is the best process to use this contract?

Military customers should work through their local base communications officer (BCO) to order services or contact DITCO-PAC at the above phone number or web address.

Prime Contractor:

AT&T

Joint Spectrum Center, Electromagnetic Spectrum Engineering Services (JSC-ESES)

HC1047-07-D-0001

What can this contract be used for?

- Spectrum-planning guidance
- System integration
- System vulnerability analysis
- Environmental analysis
- Test and measurement support
- Training and operational support
- Spectrum management
- Software development
- Spectrum certification of new weapon and sensor system development
- Electromagnetic battle space support
- Joint spectrum interference resolution support

Who can use this contract?

Unified commands, military departments, and defense agencies. These services are also available to federal and local government activities. Additionally, foreign nations can obtain assistance through Foreign Military Sales (FMS) channels. JSC can provide these services to US industries when the efforts are determined to be in the interest of national security.

What is the best source to get information and materials?

Keep **COMMAND** and **CONTROL** of the **INFORMATION BATTLEFIELD**

By using a foundation of data encryption to protect the data itself, combined with comprehensive key management to control the access to that data, government agencies, departments, and contractors can ensure the privacy and control of that information wherever it goes. And because that same foundation can be used for multiple applications across the enterprise, organizations can increase operational efficiency, while ensuring privacy, managing risk, and lowering cost.

SafeNet Enterprise Data Protection (EDP) is the only solution that secures data across the entire organization—at rest, in transit, and in use.
