DEFENSE INFORMATION SYSTEMS AGENCY

P. O. BOX 4502
ARLINGTON, VIRGINIA 22204-4502

April 2010

To Our Valued DISA Customers:

As DISA's Director for Procurement, I am pleased to present the 2010 DISA Contracts Guide. This Guide has been updated to provide a current list of Defense Information Technology Contracting Organization (DITCO) contracts available to satisfy your telecommunication service and Information Technology (IT) product and service requirements.

This year's DISA Customer Partnership Conference theme is "The Next Engagement". We strive to be proactive in supporting our customers by establishing telecommunication and IT contracts in advance of their needs. Our contracts enable interoperability and joint use systems for our warfighting forces. Our DITCO contracting offices are strategically located at the National Capital Region, Scott Air Force Base, IL, Ford Island, HI, and Sembach Air Base, Germany to support our global customers.

As you look through the 2010 Guide, you will notice many contracts are performance-based, flexible, and easy to use. Our DITCO procurement staff can assist by issuing task/delivery orders for customers, or in some cases, customers' contracting officers can take advantage of "decentralized ordering." Decentralized ordering allows organizations the flexibility of ordering and administering their own task/delivery orders. Either way, customers receive the services they require quickly and efficiently obtaining the best value solution.

The Procurement Directorate and its DITCO contracting offices are committed to providing excellent support to customers and warfighters. We look forward to working with you to acquire the telecommunication services and IT products and services you need to ensure mission success.

A handwritten signature in cursive script that reads "Kathleen Miller".

KATHLEEN MILLER
Director for Procurement &
Chief, Defense Information Technology
Contracting Organization

Build a foundation for improving the way warfighters collaborate.

HIGH PERFORMANCE. GLOBAL REACH. SECURITY. Leave it to AT&T to build the essentials into an enterprise infrastructure that can deliver end-to-end services – when and where the warfighters need them. We're committed to serving DISA, enabling all of the military services to interoperate and share real-time data over our secure communications network.

With AT&T global resources, like our industry-proven online management capabilities, DISA can take control of network performance. So critical intelligence can speed from the combat zone to the command center, and back. **Stretch.**

Data Link Service Provider (DSP)

HC1013-06-D-2001

The DSP contract provides new data link and voice capabilities for Global Air Traffic Management aircraft.

What can the contract be used for?

- Provides data and voice communications between airborne and ground subsystems
- VHF and HF radio services for aircraft not equipped with data link
- Engineering Support including configuration support and test support
- Air/Ground Data Link
- Air/Ground Voice
- Ground/Ground Data Link
- Value-Added Data Link Services—Digital ATIS, Up-linked Oceanic Clearance Delivery, Down-linked Oceanic Clearance Delivery, Direct Satellite Dialing, and Graphical Flight Services such as Aircraft Situation Display, Weather Data and Airport Data
- Air/Ground Radio
- Detailed monthly reports describing technical and managerial activities

Who can use this contract?

The Department of Defense aircraft fleets either equipped or non-equipped with Global Air Traffic Management (GATM).

What is the best process to use this contract?

Contact the Contracting Officer at 618-229-9402.

Prime Contractor:

ARINC Engineering Services LLC

Period of Performance:

Through September 30, 2010 *

* Period of Performance includes all option years.

MOBILITY SOLUTIONS

Stay connected — anywhere on the planet, any time of day or night.

END-TO-END COMMUNICATIONS

A single source for flexible, customized solutions and outstanding customer service.

HOSTED PAYLOADS

The fastest, most economical access to space. We provide the ride, you control your program.

INFORMATION ASSURANCE

Defense-in-depth design and proactive monitoring in the Intelsat Secure Operations Center.

FAR MORE

At Intelsat General, we've earned a trusted reputation as a pioneering satellite industry leader. But the reality is that we provide far more than satellite bandwidth. Government, military and commercial customers rely on us for a wide range of secure, end-to-end communication solutions that keep them connected to their people, their programs and their vital resources...any time, any place.

Our GSA SATCOM II Contract #GS00T07NSD0023 & GSA Schedule 70 Contract #GS-35F-0478U make meeting your COMSATCOM needs fast and easy.

Let us show you how we can help your organization achieve far more. Visit www.farmorethansatellites.com.

DISN Access Transport Services (DATS)

HC1013-07-D-2005 (Region 1)

HC1013-07-D-2006 (Regions 3 & 4)

HC1013-07-D-2007 (Region 2)

The DATS contracts provide telecommunication transport services in the Continental United States (CONUS) from telephone company demarcation point (telco demarc) to telco demarc. CONUS is divided into four Regions (Region 1-Western U.S.; Region 2-Midwest U.S.; Regions 3 and 4-Eastern US). DATS may also provide service normally defined as inside wire between a telco demarc and a customer-defined Service Delivery Point (SDP) at another location on the base/camp/post/station.

What can these contracts be used for?

To provide specific bandwidth for transport services to any CONUS user listed in DISA Circular 310-130-1, Table T1.1.

Who can use these contracts?

Any CONUS user listed in DISA Circular 310-130-1, Table T1.1.

What is the best source to get information and materials?

Use of DATS is based upon a provisioning solution. Please contact DISA CONUS Customer Support Division, disaconuscustomerservice@disa.mil, telephone 618-220-9922.

What is the best process to use these contracts?

Interested customers should submit their Telecommunications Service Requests through DDOE in accordance with DISA Circular 310-130-1.

Defense Information System Network (DISN) Global Solutions (DGS)

DCA200-02-D-5000 and 5001

The DGS contracts provide life cycle support management for the DISN worldwide.

What can the contracts be used for?

- Program Management
- Cost/Schedule Management
- Financial Management
- Systems Engineering
- Hardware and Software Management
- Test and Evaluation
- Manufacturing, Engineering and/or Logistics Support
- Network Information Services
- Network Management and Control-CONUS and OCONUS
- Installation and Maintenance for Asynchronous Transfer Mode (ATM) Protocol and Internet Protocol Routers-Worldwide
- Augmentation of CONUS Regional Network Operations and Security Center
- Asynchronous Transfer Mode (ATM) Services-Worldwide
- Management Information System (MIS) Support
- DISN Service Center (DSC) Circuit Implementation Team
- Transition Support Services
- Transmission Operations Management Support
- Defense Message System (DMS) Transition Hub (DTH) Hardware Maintenance
- Integrated Digital Network Exchange (IDNX) Maintenance and Operations Management
- DISN Training
- Configuration Management Program Management and Access
- DISN Program Management Support
- Digital Voice System (DVS) Program Support and Operations Center Support

Who can use these contracts?

The Department of Defense, its authorized customers and other federal agencies.

What is the best process to use this contract?

Contact the Contracting Officer at 618-229-9475 or the Contracting Officer's Representative (COR) at 703-882-0763.

Prime Contractors:

Apptis (small business)
Science Applications International Corp. (SAIC) (large business)

Subcontractors:

There are several major subcontractors (large, small and small disadvantaged businesses); subcontractors can be added at the request of the prime contractors and are not limited to only one prime contractor.

Period of Performance:

Through September 30, 2010 *

* Period of Performance includes all option years.

Is it the same conversation, the same issues, just on a different day?

Great, another meeting to discuss storage! Another 6 weeks before the equipment is ready to use? We have to spend another \$250,000? Why?

Change the conversation. Instead of feeds and speeds, why not technology as a service - a Capacity Service. Make the issue acquiring "Ready-for-Use" capacity at your facility. Focus the discussion on lowering risk, saving time and money. Stop reviewing bills of materials. Start discussing the capacity you need to accomplish your mission. Make your vendor responsible for the details - the pieces and the parts. Eliminate the purchase orders for parts overlooked on the original order.

Whether its servers, SANs, disk storage, or tape solutions, enabling capacity where you need it, when you need it, and in the precise quantity you require, saves money. Having a vendor team totally responsible for delivering fully functional systems before they invoice, now that's a whole new conversation.

VION Corporation and Hitachi Data Systems have been helping federal agencies save millions with Storage Capacity Services. Contact VION Corporation or Hitachi Data Systems to learn how you can change the conversation.

Change the conversation! Call VION at 202-467-6600 or Hitachi Data Systems at 671-437-1111.

VION

Defense Information System Network (DISN) Network Management Support Services Global (DNMSS-G)

HC1013-07-D-2023

The DNMSS-G/R Associate Support Contract (ASC) provides support services for DISN-related networks and systems, and for other Department of Defense and government networks and systems. This includes providing continuing system planning and support, operational analyses, system management, operations, maintenance and technical enhancement services at task order-specified locations for components of the DISN.

HC1028-08-D-2000

The DNMSS-G/R Network Engineering Contract (NEC) provides support services associated with network and system management and other related support services for DISA and DoD military services and agencies, and other U.S. government departments and agencies on a global basis. This includes providing continuing system and network planning, engineering, enhancement, acquisition, implementation, integration, management, maintenance and operations support at task order-specified locations for components of the DISN.

What can these contracts be used for?

- Defense Switched Network (DSN) (voice services)
- Defense Red Switch Network (DRSN) (secure voice services)
- DSN and DRSN network management systems
- Advanced DSN/DRSN Integrated Management Support System (ADIMSS/ARDIMSS)
- Integrated Network Management System (INMS)
- Joint DISN Control System (JDCCS)
- Trouble Management System (TMS)
- Report Management System (RMS)
- Integrated Configuration and Tracking System (ICATS)
- Other specified DISN networks and systems and their respective management systems

Who can use these contracts?

The Department of Defense and its authorized customers.

What is the best source to get information and materials?

Contact the Contracting Officer at 618-229-9498 or Contracting Officer's Representative (COR) at 703-882-0783. Additional information can be found at www.ditco.disa.mil/contracts/catalog.asp.

Prime Contractors:

DNMSS-G/ NEC: Computer Sciences Corp.

DNMSS-G/ ASC: Oberon Associates Inc.

Period of Performance:

The period of performance for HC1013-07-D-2023 is through June 14, 2012. *

The period of performance for HC1028-08-D-2000 is through December 23, 2012. *

* Period of Performance includes all option years.

Defense Information System Network (DISN) Satellite Transmission Service-Global (DSTS-G)

DCA200- 01-D-5002 thru 5004

The Defense Information System Network (DISN) Satellite Transmission Service-Global (DSTS-G) contracts provide a full range of global fixed satellite bandwidth, earth terminals and related satellite-based business and enterprise services and solutions.

What can the contracts provide?

- Global Fixed Satellite Bandwidth
- Bandwidth and Service Management
- Leased Earth Terminal Services
- Purchase Earth Terminals
- Global On-Site Earth Terminal Operation and Maintenance
- Commercial Teleport Services
- U. S. and Foreign Bandwidth and Terminal Licenses and Approval
- Terrestrial Interconnection Services to Support Satellite Service
- Host Nation Agreement-Negotiation Support
- Systems Engineering Support
- First Right of Refusals and Guaranteed Reservations
- DISN Common-User Hub Services
- Multiple Location Turnkey Satellite Systems

Who can use the contracts?

The Department of Defense, its authorized customers, and other federal agencies.

Defense Information System Network (DISN) Transmission Services-Pacific II (DTS-P II)

HC1019-09-D-2000

This contract is a communications “building block” of the Global Information Grid. DTS-P II provides “one stop shopping” with the contractor handling all foreign carrier and local exchange carrier coordination to connect any site in the Expanded Pacific Region to any location in the world. The Expanded Pacific Region consists of the Pacific Command (PACOM), Northern Command (NORTHCOM), Southern Command (SOUTHCOM), and Central Command (CENTCOM) Areas of Operation (AOR).

DTS-P II will provide the end-to-end transmission services and capabilities essential to the Defense Information System Network (DISN), DoD’s consolidated enterprise level telecommunications infrastructure for the expanded Pacific region. DTS-P II will support both DoD and authorized non-DoD operations. The essential characteristics of these requirements are end-to-end information transfer services, seamless interoperability with the global Defense Information System Network (DISN), positive control, robust bandwidth, provisioning agility and flexibility, diversity, security, cost-effectiveness, technology insertion and enhancements.

DTS-P II will provide the required operational transmission services and capabilities necessary for network-centric warfare. It will provide the critical transmission for the DISN-Pacific, its subsystems, components and services to enable the warrior to obtain situational awareness and attain information dominance over the battlefield. The services provided by DTS-P II will be utilized to equip the DISN with sufficient capacity to support multimedia services, voice, data, video and imagery transfer at any time or any place. DTS-P II services will be delivered from the lowest tactical level to the highest strategic level and provide assured connectivity across the entire warfighter spectrum.

What can this contract be used for?

- Dedicated Transmission
- Undersea Cable Leases
- Satellite Communications
- Asynchronous Transfer Mode (ATM) Services
- Internet Protocol (IP) Router services, including Network Access Points (NAP), Internet Exchange Points (IXP) and other Internet access points and Internet Service Provider (ISP) connections
- Encryption and Timing
- Equipment Installation and Maintenance
- Network Management and Monitoring
- Provisioning and Trouble Ticketing
- Fiber Optic Cable Installation and Maintenance

Who can use this contract?

The Department of Defense, authorized non-DoD operations, other federal agencies, and U.S. allies.

What is the best source to get information and materials?

Contact the Defense Information Technology Contracting Organization-Pacific (DITCO-Pacific) at 808-472-2733, or go to www.ditco.disa.mil/pac.

What is the best process to use this contract?

Submit a request for service to DISA or contact DITCO-Pacific using the above information. Customers will provide their requirements via DDOE.

Prime Contractor:

Verizon Business Network Services Inc.

Period of Performance:

Through March 5, 2019 *

* Period of Performance includes all option years.

ENCORE II

HC1028-08-D-2001 through 2003 and HC1028-08-D-2005 through 2027

The ENCORE II contracts provide IT solutions for activities throughout all operating levels of all customer organizations in support of all functional requirements, including Command and Control (C2), Intelligence and mission support areas, and to all elements of the Global Information Grid (GIG).

What can this contract be used for?

- Task Area 1 - Enterprise IT Policy and Planning
- Task Area 2 - Integrated Solutions Management
- Task Area 3 - Performance Benchmarking
- Task Area 4 - Business Process Reengineering (BPR)
- Task Area 5 - Requirements Analysis
- Task Area 6 - Market Research and Prototyping
- Task Area 7 - Information and Knowledge Engineering
- Task Area 8 - Custom Application Development
- Task Area 9 - Product Integration
- Task Area 10 - Test and Evaluation (T&E)
- Task Area 11 - Asset Management
- Task Area 12 - Communications Engineering
- Task Area 13 - Security Engineering Certification and Accreditation
- Task Area 14 - Telecommunications Support
- Task Area 15 - Computer-Telephony Integration (CTI)
- Task Area 16 - Web Services
- Task Area 17 - Operations Support
- Task Area 18 - Hardware
- Task Area 19 - Software
- Task Area 20 - Managed Services

Who can use this contract?

Military services, the Department of Defense and other agencies of the federal government.

What is the best source to get information and materials?

Go to www.ditco.disa.mil/hq/contracts/encorllchar.asp.

What is the best process to use this contract?

Task order guidelines at the above Website reflect easy, step-by-step instructions and sample documents showing how to assemble a requirements package. The ENCORE II Task Order Guidelines is a comprehensive handbook of how to use the ENCORE II Contracts. The guidelines consist of a five chapter basic document with twenty-four separate attachments to explain ENCORE II and provide templates for assembling your requirements package.

External Contracting Agencies may place orders directly against this contract. A copy of the contract is available on the above Website.

Europe Enterprise Wireless Services

HC1021-05-D-2000

The Wireless Services Contract provides commercial Global System for Mobile (GSM) telephone services, wireless personal digital assistant (PDA) services, and other wireless services for all DITCO Europe customers throughout the U.S. European Command (USEUCOM) and the U.S. Central Command (USCENTCOM) areas of responsibility (AORs).

What can the contract be used for?

- Wireless equipment
- Wireless services and equipment
- Local Wireless Service
- Wireless PDAs/Service
- Long-Term Subscriptions
- Short-Term Rentals
- 24/7 Customer Service

Who can use this contract?

All DITCO Europe customers stationed in Afghanistan, Bahrain, Belgium, Bosnia Herzegovina, Bulgaria, Croatia, Czech Republic, Egypt, France, Germany, Greece, Iraq, Israel, Italy, Kuwait, Luxembourg, Netherlands, Nigeria, Oman, Pakistan, Poland, Qatar, Romania, Spain, Turkey, United Arab Emirates, United Kingdom and Yemen.

What is the best process to use this contract?

The DITCO Europe Enterprise Wireless Contract offers several options for the placement of orders as follows:

■ **Army Commands under USEUCOM**—Shall order via HQ, 5th Signal Command G4, Contract Management Division CMR 421 APO, AE 09056, DSN: 314-380-5324.

■ **Decentralized Ordering**—Ordering may be authorized for all U.S. government contracting offices and authorized ordering officers appointed by DITCO Europe. Decentralized orders are subject to the DITCO Europe Enterprise Wireless Contract administrative fee of 1 percent. This fee will be applied to all costs associated with the total monthly value of the wireless services and products purchased under this contract.

Prior to ordering, all interested contracting offices and ordering officers shall request approval from the DITCO Europe contracting officer. Ordering Instructions shall be provided by DITCO Europe at the time of appointment.

■ **Centralized Ordering**—DITCO Europe Contracting Office is available for the placement of orders in support of customer's wireless needs throughout the USEUCOM and USCENTCOM AORs. All orders placed directly through DITCO are subject to the nominal DITCO fee for service of 2 percent. All wireless requests are to be submitted to DITCO via the DISA Direct Order Entry (DDOE) ordering tool: (<https://www.disadirect.disa.mil/products/asp/welcome.asp>). For additional information or ordering officer requests, feel free to contact the DITCO Europe contracting officer at DSN 314-496-7658; commercial: +(49) 6302 922732.

Iridium Enhanced Mobile Satellite Service (EMSS)

HC1047-08-D-0002

The EMSS contract provides a full range of Iridium satellite and ancillary equipment to be used with Iridium satellite airtime service, for instance, the purchase of Iridium telephones, pagers, secure modules, ancillary equipment and active or inactive Subscriber Identification Modules (SIM) cards. Telephones can be used worldwide except for four countries: Hungary, Poland, North Korea and North Sri Lanka. With proper encryption loaded, one Iridium telephone to another Iridium telephone has Top Secret capability. An Iridium telephone also allows a Secret connection to a desktop telephone, and plans are under way to eventually provide a Top Secret capability. Lead times are seven to 14 days.

What can this contract be used for?

To purchase the following equipment:

- Iridium 9505-securable satellite telephones
- Iridium-secure modules
- SIM cards
- Ancillary equipment (batteries, etc.)

Who can use these contracts?

The Department of Defense, authorized non-DoD customers and customers in Australia, United Kingdom, Canada and New Zealand.

What is the best source to get information and materials?

Picture your own Federal procurement team

The business of acquisition requires in-depth knowledge and a keen understanding of the big picture. As a Federal acquisition shared services provider, focusing on the details is what the Acquisition Services Directorate – ASD – does best. Our experienced contracting officers will handle all phases of your procurement. From one Federal agency to another, we deliver a proven process that's completely compliant with laws and regulations. So you can focus on meeting mission requirements on time, every time. **We're Always Part of the Picture.**

Joint Hawaii Information Transfer System (JHITS)

HC1019-06-D-2002

The Joint Hawaii Information Transfer System (JHITS) contract provides the primary inter-and intra-base telecommunications services for the Department of Defense in the state of Hawaii, providing end-to-end common user switched and dedicated transmission services.

What does this contract include?

Task Service CLINs:

- Manage day-to-day Network Telecommunication Services (NTS) operations
- Switch Telecommunication Services (STS) Maintenance
- Base Telecommunication Services (BTS)
- Navy Pier Side Telecommunication Services (PTS)

CLIN-based services: (MILDEP or DISA-unique telecommunications service CLINs ordered "as required")

- Maintenance of critical assured services
- Installation/Maintenance of Point-to-Point dedicated circuits
- Installation/Maintenance of outside plant cable
- Installation/Maintenance of customer premise equipment
- Switched Voice Services (SVS) & ISDN for Outer Islands
- Maintenance of Network Management System equipment
- Vendor-unique provisioning workstations and software

What can this contract be used for?

- Dedicated Transmission
- Switched Voice (Analog and Digital)
- Pier Side Communications (Ship lines)
- Switched Data
- Asynchronous Transfer Mode (ATM) Services
- Integrated Services Digital Network (ISDN) Services
- 24/7 Military Operator Services
- Emergency 911
- Customer Premise Equipment Installation and Maintenance
- Network Management and Monitoring
- Automated Provisioning and Trouble Ticketing
- Fiber Optic Cable Installation and Maintenance Training

Who can use this contract?

The Department of Defense and other federal agencies in the state of Hawaii.

What is the best source to get information and materials?

Contact the JHITS Program Office at 808-472-2200, the Defense IT Contracting Organization-Pacific (DITCO-Pacific) at 808-472-2507, or go to www.ditco.disa.mil/pac.

What is the best process to use this contract?

Military customers should work through their local base communications officer (BCO) to order services or contact DITCO-Pacific at the above phone number or Web address.

Prime Contractor:

AT&T

Period of Performance:

Through August 17, 2016 *

* Period of Performance includes all option years.

Looking for a network without limits?

To perform up to their capabilities, the world's most advanced armed services personnel need top performance from their networks. And those networks require the right physical layer network infrastructure supporting them. This is precisely why CommScope designs and builds physical layer solutions to such high standards — to ensure that security forces not only meet their technology needs but also complete the mission at hand when performance matters most.

They have unique challenges. The network should never be one of them. To make their network — and their mission — more successful, the answer is simple. CommScope.

Joint Spectrum Center, Electromagnetic Spectrum Engineering Services (JSC-ESES)

HC1047-07-D-0001

What can this contract be used for?

- Spectrum-planning guidance
- System integration
- System vulnerability analysis
- Environmental analysis
- Test and measurement support
- Training and operational support
- Spectrum management
- Software development
- Spectrum certification of new weapon and sensor system development
- Electromagnetic battle space support
- Joint spectrum interference resolution support

Who can use this contract?

Unified commands, military departments and defense agencies. These services are also available to federal and local government activities. Additionally, foreign nations can obtain assistance through Foreign Military Sales (FMS) channels. JSC can provide these services to U.S. industries when the efforts are determined to be in the interest of national security.

What is the best source to get information and materials?

Contact the Contracting Specialist at 410-293-2410 or go to www.disa.mil/jsc.

Prime Contractor:

ITT Corp., Advanced Engineering & Sciences Division

Advanced Security... End to End Encryption using *myKryptoFon*

Secure Communications are no longer a luxury, they are essential for conducting government business in both defense and non defense agencies.

GOVERNMENT SPECIFICATIONS:

- Sensitive But Unclassified (SBU) Grade VoIP Softphone To Protect Voice, Conferences, Chats, PTT, And File Transfers
- NIST Standard Level / AES 256 Bit Encryption
- Meets NSA Suite 'B' Standard (Rotation)
- On Fixed Or Mobile Platforms

CAPABILITIES:

- Complete End To End Encryption
- Operates On Wired, Wi-Fi, 3G, Satellite BGAN, Or Any Internet Connection
- Multiple Keys For Different Groups Or Users
- Interoperates Between Mobile Smartphones And Desktops
- Encryption Key Rotation – With Modulating Keys And Time Life Span
- Available on Windows PC, Windows Mobile and **select Blackberry Devices**

UNIQUE FEATURES AND BENEFITS:

- Simple Implementation - no servers, secure VPN tunnels, or other hidden services required.
- Complete End-to-End Encryption - other solutions decrypt in their servers.
- Advanced Encryption – patented key modulation/rotation technology.
- Self-Service Key Management – users create & distribute encryption keys.
- Multiple Encryption Keys – dedicate encryption keys for specific missions, projects or clients.
- Centralized Destruction/Disablement feature – provides C2 the ability to interrupt or disable the device remotely.
- Simultaneous Secure Communications – encrypted multiple chats, voice conference and files transfer simultaneously, each with unique encryption keys.
- Cost - \$'s/month versus \$1000's to purchase with no hidden infrastructure costs.
Made in the U.S.A.

ManTech Integrated Data Systems

HC1028-09-A-2008

The ManTech BPA provides a Source Selection Tool that will be used by acquisition organizations to conduct proposal evaluations in best value competitions. The Source Selection Tool is a full service capability that provides DITCO/DISA a high-performance software application plus access to technical support, user training and best value process consulting. Decentralized ordering is allowed.

What can this BPA be used for?

Decision Point is a full service capability that provides DITCO/DISA a high-performance software application plus access to technical support, user training and best value process consulting. The application's interface guides the customers' evaluators through the proposal evaluation process to ensure their review complies with the approach stated in the request for proposal (RFP) and source selection plan (SSP). Evaluator comments are collected and data based, making electronic query, analysis, consensus-building, reporting and final archiving simple, accurate and efficient. This tool allows evaluators to enter proposal strengths, weaknesses, risks, scores and deficiency reports.

Who can use this contract?

All Department of Defense agencies. DISA contracting offices and external agency contracting offices outside of DISA and DISA/PLD are authorized to place orders under this BPA.

What is the best source to get information and materials?

Customers should contact DITCO Scott directly at ditcoitreg@disa.mil.
