

The Only Magazine Devoted Exclusively to Military Space

Military Space & Missile Forum

March 2009
Volume 2 | Issue 2

COVER AND IN-DEPTH INTERVIEW WITH:

General Kevin P. Chilton

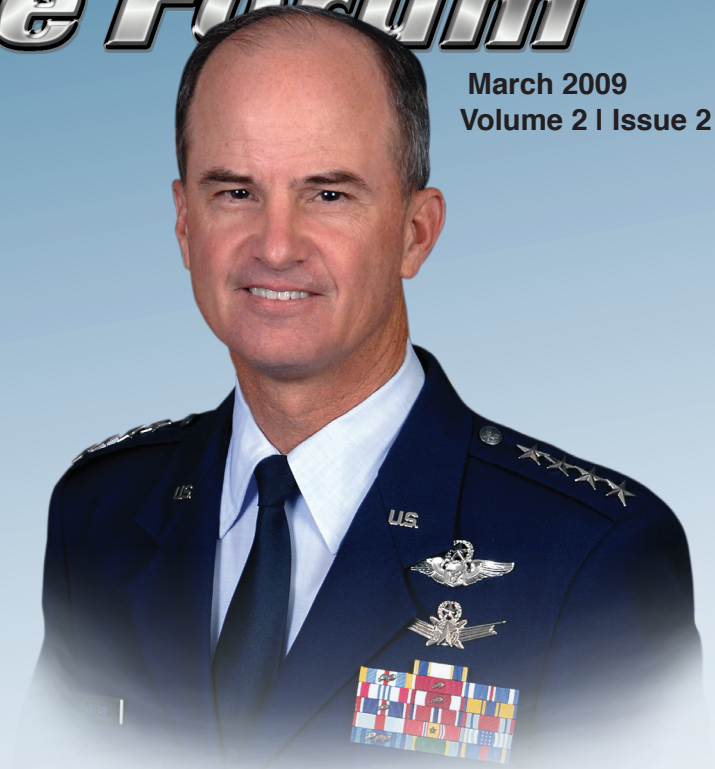

Commander, U.S. Strategic Command
(Invited)

Features:

- **Tactical High Area Altitude Defense**
THAAD will provide rapidly deployable, ground-based missile defense that will deepen and extend the BMDS battlespace. The author will chart the path for fielding and deploying this important system element.
- **Space Tracking and Surveillance**
We will examine how U.S. DoD's capability to acquire and track a missile will increase through the maturing of Defense Support Program and the follow-on SBIRS & Space Tracking and Surveillance System programs.
- **Space-Based C2 Enablers**
The author will highlight the command and control capabilities being fielded and planned for the current and next generations of military communication satellites.
- **National Security Space Institute**
The National Security Space Institute (NSSI) is the Air Force Space Command's space education and career professional development arm. We'll learn how it achieves its mission of providing full-spectrum education and tailored space training to Department of Defense personnel.

Special Features:

- **FY 2010 Budget Overview**

Special Section: Joint Space Operations Center

VIEW FROM THE HILL:

**Rep. Parker Griffith
(D-Ala.)**

Representing Alabama's 5th
congressional district

Closing Date: March 13, 2009
