# 75 watts, available now.

See us in the SAIC booth at MILCOM  
Nov. 17-19, 2008 San Diego, CA

## Get more in power.

- Full-rated power across the 30–512 MHz frequency range
- Manual and remote multilevel power control for 12, 25, and 50/75 watts
- 75 watts for UHF 220–324 MHz and SATCOM uplink
- Radio manufacturer-independent
- Available with or without MBITR charging pocket
- True HAVEQUICK and SINCGARS compatibility
- Makes manual band switching a thing of the past

# NIGHT VISION

BUYERS GUIDE

---

# By land. By air. By sea. By SCHOTT.

Wherever you operate, SCHOTT components enhance the performance of today's most critical military equipment.

Chances are you encounter SCHOTT technology every day – perhaps even a few times a day. In fact, we're the number one fiber optics component supplier in the world for night vision technology. Our superior lightweight glass and glass-ceramics offer enhanced ballistic performance and survivability across a wide range of force protection products. In addition, our advanced materials solutions span the full UV to IR spectrum and are found in satellites, missile domes, lasers and more. Our hermetically sealed electronic packaging is the building block for the world's state of the art sensors, radars and communication systems. By land, by air or by sea, the future of defense starts with SCHOTT today.

Defense  
SCHOTT North America, Inc.

**SCHOTT**  
glass made of ideas

Owning the night became a phrase that exemplified the tactical advantage that U.S. forces had over virtually every adversary on the battlefield. It was a reflection of the technology and equipment sophistication that the defense industry was able to develop to warfighter standards and deliver to U.S. forces. Over time operating at night has become more common place and sports enthusiasts can order night vision devices to gain even greater advantage over their prey. So too can unfriendly forces.

The military continues to ask more and more of industry to meet its operational needs and to stay ahead of what their adversary can acquire.

Special Operations Technology magazine compiles our annual Night Vision Buyers Guide as a quick reference tool on companies in field, where they are and how to get hold of them.

## ADAMS INDUSTRIES INC.

P.O. Box 641413  
Los Angeles, Calif. 90064  
Chris Adams  
cbadams@adamsindustries.com  
310-472-3017  
www.adamsindustries.com

Adams Industries is a designer, manufacturer and distributor of military electro-optics. We specialize in night vision and thermal applications from man-portable short range systems to extreme long range applications. See our new Air/Ground Warrior battery packs for ANVIS/PVS-23 systems and our new ANVIS/PVS-23 helmet mount systems for infantry soldiers!

## ACE ELECTRONICS

1090 Broadway  
West Long Branch, N.J. 07764

## Dominate the Night with HUD-Integrated Low Profile Night Vision

### AN/PVS-21 Night Vision Goggles with EHUD

Our advanced low profile night vision goggles provide cutting-edge Enhanced Heads-Up Display (EHUD) capability. Now, warfighters can display critical battlefield information in full color – superimposed onto their night vision image – helping them gain superior situational awareness and tactical advantage by receiving information where they need it, when they need it most.

[www.laserdevices.com](http://www.laserdevices.com)  
 Laser Devices' AN/PEQ-15A, currently contracted by the U.S. DoD, is equipped with both infrared and visible laser pointers (combined into a single laser module), and a focusable infrared laser illuminator. Laser functions include Visible pointer, IR pointer, IR illuminator; or IR pointer and IR illuminator combined. Fully adjustable for windage and elevation, AN/PEQ-15A can be aligned for pin-point accuracy. The single module design simultaneously aligns both the visible and infrared pointers. Products available through GSA Advantage program. Call 800-235-2162 or 831-373-0701 for details.

**LEUPOLD & STEVENS**

PO Box 688  
 Beaverton, Ore. 97075  
[www.leupold.com](http://www.leupold.com)  
 Leupold employs over 600 people in its state-of-the-art Beaverton, Oregon,

facility where rugged, dependable, high performance optics have been designed, machined and assembled since 1907.

[www.us.schott.com/defense](http://www.us.schott.com/defense)

For over 30 years, Schott has delivered a wide range of leading edge glass and glass-ceramic solutions for defense and security applications. Schott's optics, fiber optics, armor material and electronic packaging products are being used in the field today to keep soldiers safe and to improve their effectiveness. In addition, Schott is working with leading military and defense industry partners to develop new night vision optical components enabling the latest generation in image intensification technology.

Schott offers the night vision industry both standard and custom designed optics and fiber optics for new types of defense and security applications.

## SENSOR TECHNOLOGY SYSTEMS INC. (THE O'GARA GROUP SENSOR SYSTEMS DIVISION)

2794 Indian Ripple Road

[www.sts-eo.com](http://www.sts-eo.com)

Sensor Technology Systems, Inc. (STS), part of The O'Gara Group Sensor Systems Division, offers the capabilities, resources, and capacity to supply the entire spectrum of military and civilian defense agencies with the most advanced night vision capabilities. Our flagship AN/PVS-21 Low Profile Night Vision Goggle (LPNVG) is the choice of elite organizations worldwide

conducting aggressive, high-intensity land, sea, and air missions. Its unique low profile configuration, advanced see-through optics, and enhanced heads up display (EHUD) for color sensor fusion capability significantly increase mission performance for discriminating operators in all operational environments. For more information contact [stan.babb@ogaragroup.com](mailto:stan.babb@ogaragroup.com) or call 937-490-2509

## SIERRA PACIFIC INNOVATIONS CORP

6620 S. Tenaya, Bldg #100  
Las Vegas, Nev. 89113  
[www.imaging1.com](http://www.imaging1.com)

SPI offers advanced FLIR thermal infrared imaging systems for night vision, force protection, law enforcement and military tactical applications

## SMARTRONIX INC.

22685 Three Notch Road  
California, MD 26019  
301-737-2800  
[sales@smartronix.com](mailto:sales@smartronix.com)

[www.smartronix.com](http://www.smartronix.com)

Meet your light discipline requirements with Smartronix Night Vision Imaging System (NVIS) solutions designed for covert ground and aviation applications. Our clip-on solution is ideal for a quick and reliable night-vision compatible retrofit to any laptop LCD screen eliminating the need for a poncho and red lens flashlight. Another vision related product of interest includes our laser range finder wireless adapters which eliminate the restrictions of being tethered by a cable and adds the versatility of connecting to any Bluetooth compatible device. Both products are combat proven solutions and currently used by conventional and special forces units. GSA Schedule: GS-35F-0362J

 +33 476 28 77 46  
[www.sofradir.com](http://www.sofradir.com)

Sofradir develops and manufactures advanced infrared detectors (IR) for military, space and industrial applications. It specializes in cooled IR detectors based on a sophisticated high performance technology, Mercury Cadmium Telluride (MCT). Sofradir's short-wave, mid-wave and long-wave MCT detectors cover a full range of applications. They are integrated in equipment and systems that have been proven on the battlefield as well as in military surveillance and scientific space observation missions. Sofradir is now offering Epsilon (384x288 15µm pitch) the smallest, lightest weight and lowest

power consumption MWIR MCT detector on the market that satisfies demands for more compact army equipment.

[www.spectrumfilters.com](http://www.spectrumfilters.com)  
 Orion night vision filters allow the eye to dark-adapt 6x-faster than an unfiltered

eye while minimizing symptoms of night vision blindness when wearing NVGs. These patented filters reduce eye fatigue, as well as reduce unwanted reflected green light by 75+. Orions are easily retrofitted to fielded NVGs, including many thermal and fusion imaging systems. Orion filters are ITAR-regulated by the U.S. Department of State and are available only to U.S. military, federal law enforcement and select U.S. fire fighting agencies.
