

WHO'S WHO

Veterans Integrated Service Networks

A QUICK GUIDE TO THE FACILITIES, LOCATIONS AND NETWORK DIRECTORS OF THE DEPARTMENT OF VETERANS AFFAIRS' 21 VISNs

Founded in 1930 as the Veterans Health Administration, the Department of Veterans Affairs serves more than 27 million veterans through a nationwide system of hospitals, clinics, Veterans Integrated Service Networks (VISN), data processing centers, and National Cemeteries. These facilities require a broad range of goods and services that are purchased on a national, regional, and local level.

This guide aims to provide readers with a useful overview of the VA's 21 VISNs, including their facilities, locations and contact information. VISNs provide care to more than 5.5 million veterans each year, including post-combat care that the Veterans Health Administration says is the best ever provided to veterans anywhere. Advances include polytrauma care, innovative treatments for traumatic brain

injury and post-traumatic stress disorder and a broad expansion in services provided through community-based outpatient clinics and mobile vet centers.

The VHA has also sought to transform its mental health care system, adding 4,000 mental health care workers and improving its prevention program, which includes a new telephone hotline that VHA says has already rescued more than 4,000 veterans at imminent risk of suicide.

For those wondering whether the absence of a VISN 13 or VISN 14 reflects a superstitious frame of mind, VA public affairs officials note only that the VHA system previously included 22 VISNs, but that 13 and 14 were combined to create VISN 23.

VISN 1: New England Health Care System

- Edith Nourse Rogers Memorial Veterans Hospital (Bedford, Mass.)
- Manchester (N.H.) VA Medical Center
- Northampton VA Medical Center (Leeds, Mass.)
- Providence (R.I.) VA Medical Center
- Togus VA Medical Center (Augusta, Maine)
- VA Boston Health Care System, Brockton Campus
- VA Boston Health Care System, Jamaica Plain Campus
- VA Boston Health Care System, West Roxbury Campus
- VA Connecticut Health Care System Newington Campus
- VA Connecticut Health Care System West Haven Campus
- White River Junction (Vt.) VA Medical Center

Effective Resuscitation: *It's all about Improving Outcomes*

Improved quality of care and clinical outcomes are the Veterans' Healthcare System's primary goals in treating coronary heart disease. ZOLL shares the VA's commitment to improving resuscitation outcomes. From our code-ready hospital defibrillators to our non-invasive cardiac support pump to a wearable defibrillator, ZOLL has the solutions to support the care of our veterans.

R Series®, our Code-Ready® Defibrillator, provides Real CPR Help® and has See-Thru CPR® technology to assist in delivery of effective CPR during your codes. An AED option is available for early defibrillation for BLS-trained responders; with the simple press of a button, the defibrillator can be converted into a fully functional ALS device.

AutoPulse® Non-invasive Cardiac Support Pump delivers effective and consistent chest compressions that are called for in the AHA guidelines, and are necessary for maintaining coronary artery perfusion pressure and enhancing survival.

The LifeVest® Wearable Defibrillator helps VA facilities treat one of their highest priority concerns - heart failure. The LifeVest® is part of the continuum of care, protecting veterans from sudden cardiac arrest during medical therapy optimization, while allowing them to return to activities of daily living.

To learn more, contact your ZOLL Sales Representative
